If you are considering taking up cycling with a Unicam product please read carefully.

Whilst our products are manufactured to a very high standard and have a 100% safety record it is important that you are aware of the potential dangers of cycling, especially with an injury or disability.

Always consult a qualified health professional, doctor or physiotherapist. If you are an amputee consult your prosthetist-orthotist as not all limbs are suitable for cycling. We are happy to liaise with your written permission.

Cycling can be inherently hazardous. Please consider the consequences of a fall especially when cycling with an existing injury or condition.

Consider all the options from exercise bikes, bicycles with static trainers, upright and recumbent tricycles, tandems, electric bicycles and tricycles.

If in doubt of compatibility of your existing bike or future purchase please ask for advice.

Personal information will be kept in the strictest confidence.

Over the years we have many happy customers and are proud to have been able to make a positive contribution to people's lives.

Happy Cycling

Paul Butterworth
Managing Director
Unicam Limited
